.asp Active Server Page

Internet Suffixes

.com is the most common and most recognized domain suffix.

- It stands for "commercial" and is mostly used by commercial websites.
- However, anyone who wants to register a domain name can register a name ending in **.com**, whether their site is going to be used for commercial purposes or not.

.net stands for "network"

.org stands for "organization"

.edu Education

.biz Business

.gov Government

.mil Military

.info Information Service

.name Personal Websites

.me Personal Websites

.tv Television Station

.us United State

.mobi Mobile Phones

NOTE: All but the **.edu**, **.gov**, and **.mil** domains can be registered and used by anyone, meaning the sites do not always match the definition of the suffixes they use.
